DeflektoR

No Heroes. No Foes. Just skill and technology are all that's needed to complete the optical circuits of DEFLEKTOR.

DEFLEKTOR is an experience in laser logic. Guide your laser beam around each screen. Reflectors, refractors, mirrors, absorbers, polarisers and fibre optics are your basic apparatus. Your precise judgement of the angles and paths of your high intensity laser are the only means by which your beam can be directed towards the home receiver.

DEFLEKTOR is frustratingly compulsive, amazingly cunning; but above all it's unbelievably addictive.

....Probably the most challenging game you'll ever play.

Gremlin Graphics Software Ltd., Alpha House,
10 Carver Street, Sheffield S1 4FS. Tel: (0742) 753423
